BED MANAGEMENT FOR HOSPITALS

Optimise bed management with HPM®

HPM® – the intelligent digitalisation solution for safe and efficient collaboration between nursing/care, hygiene, medical technology and cleaning.

REAL TIME LOCATION SYSTEM
+ HYGIENE STATUS
+ TECHNICAL STATUS
OF MEDICAL DEVICES

HPM® for improved bed management in hospitals

Optimise your bed management with the real-time localisation and process management solution HPM®. HPM® enables the precise localisation of hospital beds and displays information on their hygiene and technical status. The real-time data generated with HPM® helps hospitals to simplify bed management processes and to optimise the use of resources – for central or decentral bed processing as well as processing at the bed bay. With HPM®, hospitals receive a precise, real-time overview of available clean beds and of the beds requiring processing, repair, maintenance or inspection.

Beds that are contaminated with germs are clearly marked as such in HPM®. The system provides cleaning and processing instructions tailored to the device and the nature of its contamination. In this way, cleaning and processing staff receive ongoing training and workplace safety is sustainably improved. HPM® makes maintenance and inspection intervals visible to cleaning staff and ensures that beds that are due for servicing or inspection are sent to the medical technology department following cleaning. All process steps are documented using real-time data.

Transparency

The exact location of medical devices can be viewed in real time, including hygiene and technical status information.

Documentation of cleaning

Digitally supported processes enable detailed documentation of the individual cleaning steps.

Digital germ and bacteria tracking

Contamination of medical devices with germs and bacteria can be made visible in real-time.

Efficiency

Real-time location data on the usage of medical devices can be used to improve processes and capacity utilization.

Workplace safety

Maximize staff safety by making the hygiene status of your medical devices transparent and by documenting cleaning processes in real time.

Maintenance and inspection intervals

HPM® controls all upcoming maintenance and inspection dates and issues early reminders.
